Large/small-scale Projects

Windows/MAC

Creative Solutions

Work Experience:

Muvd (<https://coding-p1-g1.github.io/muvd/>)

Nov 2021 -

A user interaction based application combining movie info and review API calls to curate movies based on user's mood or search input.

Led a team of 4 and managed Github org. One of two primarily working on application's JavaScript.

Tested the application's function, found issues, and resolved them. Great communication, time management, and efficient teamwork to meet deadlines.

Weather Dashboard (<https://briannawoodruff.github.io/Weather-Dashboard/>)

Nov 2021 -

A weather dashboard app where the user searches a city and the current weather and the 5 day forecast is returned.

Utilizing primarily Javascript and CSS, this application calls the Open Weather Map API to populate the page with current weather data and the 5 day forecast for a city the user inputs. Previous cities searched are saved in localStorage and then populate under the search bar with functioning buttons.

Work Day Scheduler (<https://briannawoodruff.github.io/Work-Day-Scheduler/>)

Oct 2021 -

A simple calendar to keep track of a user's work day schedule. This application uses JavaScript, Bootstrap, MomentJS, and localStorage to tell the current time for the user and keep track of the hour. User then inputs their schedule and clicks save to store in localStorage.

Education:

Northwestern/Trilogy Full-Stack Coding Bootcamp

Sept 2021 to March 2022

University of Wisconsin Madison - BA Communication Arts

2015-2018
